Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 4, 6, 8, 10-12 and 18 are rejected under 35 U.S.C. 102(b) as being anticipated by Kiselman et al., S.U. 1,745,873.

Kiselman discloses an expander system (2, 5, 6) for expanding a downhole tubular element (9) having an expander (6) moveable between retracted and expanded positions. Kiselman discloses the expander (6) having an integral body (3) or cage having an upper and lower end. Kiselman discloses a tapering expansion surface (5) near the upper end the body for expanding the tubular element (9) when working pressure is applied to move the expander (6) to the expanded position. Kiselman discloses the expander body (3) or cage having a plurality of axially closed slots having the expander (6) therein spaced about the circumference and spaced by segments of the cage (3).

Kiselman discloses the expander (6) in the retracted mode (fig 1) having a larger diameter than the tubular element (9).

Kiselman discloses an inflatable fluid chamber within an inflatable bladder (7).

Allowable Subject Matter

Claims 3, 5 and 7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 13-17 and 19 are allowed.

Response to Arguments

Applicant's arguments with respect to the prior art of Sortor and Mills have been fully considered and are persuasive.

Applicant's arguments with respect to the prior art of Kiselman et al. have been fully considered but they are not persuasive.

Applicants argue the segments (6) of Kiselman are not part of the expander body (3) at either end.

The cage (3) and extendable sectors (6) are integral; wherein the cage apertures enveloping the sectors are considered to be slots having ends that do not reach the distal ends of the cage.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

Art Unit: 3672

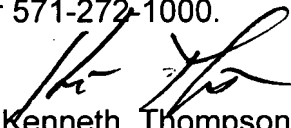

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
